## Why we need Smart Cards?

In today's world, the ability to verify a person's identity is increasingly useful and necessary. Whether it is for security, time tracking, membership, or loyalty programs, personalized ID cards have become the standard tool for verifying identity.

ITELL trying to sets a new standard for fast, easy design and issuance of personalized ID cards.

## How is system

### Wizards

System incorporates easy-to-navigate wizards that guide you step-by-step through the process of setting up your database, data entry screen, and card design. Of course for the more technically inclined, we provide all the advanced tools you need to provide the fullest flexibility in setting up your system.

### Printing

System will print to virtually any Windows compatible printer. You have the option to print a single card at a time, flag a record for printing at a later time, or batch print all records that meet the criteria that you specify.

### Forms & Reporting

In addition to printing ID cards, System can also generate full-page dossiers or forms for individuals, with the option to print a single record or multiple records per page. System also gives you the ability to maintain audit trails and to generate reports on card production statistics, printing histories, and system access logs.

### Operation Environment

Windows 95/98/NT/2000/ME Compatible  
Supports long file names  
True 32-bit architecture

Translatable language tables for foreign languages  
Operates across TCP/IP, Named Pipe, and other network protocols  
Multi-user network ready

### Database feature

Data Wizard builds MS Access 2000 database to your specifications  
Paradox, Dbase/Xbase, FoxPro, Excel, ODBC  
(for connecting to MS SQL Server, Oracle, etc.)  
Add tables to existing database

## Features

1. Environments for maximum Flexibility and performance.
2. Easy to use.
3. At a glance summary of time and attendance details with single person or group.
4. System gives you the ability to link a large number of users and/or manage large numbers of Card holder.
5. Leave management system.
6. Generate reports like In and out time report of single person or group, Late Report, Daily working hours report etc.
7. Reports can be customized.

## **Technical Specifications:**

### **Recognition Technique**

Smart Card/ Finger Print

### **Fingerprint Scanner**

- High-resolution 508 DPI imaging
- Utilizes ST's patented TouchChip technology, resulting in high quality fingerprint images in any environment

### **Smart Card reader**

- ISO 7816-3 and PC/SC compliant
- Supports all micro-controller cards, with T=0 or T=1 protocols
